Professional Summary

Cybersecurity professional with 3+ years of experience across Incident Response, Threat Intelligence, External Attack Surface Management, Vulnerability Management, and Access Management. Experienced in OSINT-driven risk analysis, managing external exposure, and improving organizational cyber risk ratings through strong internet hygiene practices. Hands-on in vulnerability identification, validation, remediation tracking, and penetration testing. Leverages SIEM, EDR, and WAF technologies for real-time threat detection and response, and collaborates cross-functionally to translate technical findings into actionable risk insights.

Skills

Vulnerability Management: Nessus Professional, Vulnerability Assessment, CASM (CloudSek)

Threat Intelligence: OSINT, SecurityScorecard, BitSight, Xpanse, RiskRecon

Access & Identity Management: SailPoint IIQ, IBM z/OS Mainframe

Security Operations: SIEM (Seceon), EDR (CrowdStrike), Incident Response, Threat Hunting

Security Tools: Prophaze WAF, FTK, FourCore, Burp Suite

Programming & Analysis: Python, Malware Analysis, Digital Forensics

Professional Experience

Bank of America

Info Security Analyst October 2025 – Present

- Monitored and managed the organization's external attack surface using SecurityScorecard, RiskRecon, BitSight, and Xpanse, improving cyber risk ratings through proactive internet hygiene practices.
- Performed OSINT-driven analysis using Shodan, VirusTotal, and similar tools to identify external perimeter risks, including shadow IT, phishing domains, leaked data, and credential exposure.
- Validated and triaged vendor-reported findings, eliminated false positives, analyzed OSINT risk scores, and escalated P1/P2 issues for timely remediation.
- Mapped external assets to applications and owners and collaborated with Infrastructure, Application, Cloud, SOC, and Vendor Risk teams to prioritize remediation and reduce organizational exposure.

Senior Tech Associate August 2024 – October 2025

- Conducted vulnerability identification and validation across servers, applications, and cloud assets using Qualys VMDR, Qualys TotalCloud, and Tanium.
- Performed manual validation (Nmap, PowerShell, version verification) to eliminate false positives and worked with Qualys support for resolution of tool-related issues.
- Partnered with application, infrastructure, and cloud teams to recommend, track, and validate remediation efforts based on risk priority and SLA.
- Automated vulnerability reporting and developed weekly dashboards highlighting scan coverage, remediation status, SLA adherence, and risk trends.

Apprentice August 2023 – August 2024

- Collaborated with the Global Access Operations Mainframe team to control and maintain enterprise wide mainframe access.
- Administered user access provisioning/deprovisioning on mainframe systems, ensuring timely updates and protocol adherence.
- Resolved access-related issues to support end users and improve overall system efficiency.
- Led comprehensive training sessions on cyber attacks for the entire information security team, covering diverse topics from common attack vectors to effective mitigation strategies.

RAXA Techno Security Solutions, GMR Group December 2022 – August 2023
Cybersecurity Trainee

- Configured and managed Web Application Firewall (WAF) to enhance web application security against potential attacks.
- Executed comprehensive Vulnerability Assessment and Penetration Testing (VAPT) for diverse applications and systems.
- Identified and exploited vulnerabilities using a mix of automated tools and manual techniques.
- Monitored and identified vulnerabilities in real-time using CASM (Continuous Attack Surface Monitoring).
- Utilized SIEM and EDR tools to detect and respond to security incidents in real-time.
- Led red teaming simulations to assess the effectiveness of security implementations.
- Led quarterly Vulnerability Management (VM) scans on servers, network, and security devices, & provided remediation plans based on the scan results.

Education

Master of Technology 2021 – 2023 | Gandhinagar, India
National Forensic Sciences University
Cybersecurity

Bachelor of Technology 2016 – 2020 | Bahadurgarh, India
PDM College of Engineering
Information Technology

Projects

ICS Vulnerability Assessment Tool

- Built a passive ICS vulnerability assessment tool to analyze PLC configuration files and identify security weaknesses.
- Implemented parsers for L5X and CXT files to extract asset and configuration data without impacting operations.
- Improved assessment efficiency and strengthened protection of critical infrastructure environments.

Static Malware Analysis

- Developed a Python-based static malware analysis tool to analyze multiple samples concurrently.
- Automated key analysis steps, improving investigation speed and consistency.
- Enabled faster triage and assessment for security analysts.

Certificates

Certificate of Cloud Security Knowledge v5
Cloud Security Alliance(CSA)

Certificate of Competence in Zero Trust
Cloud Security Alliance(CSA)

IBM z/OS Mainframe Practitioner
Coursera

Proofpoint Certified Email Authentication Specialist
Proofpoint

Certified Network Security Practitioner
The SecOps Group

Certified AppSec Practitioner
The SecOps Group

Network Security Expert - NSE 1, NSE 2 and NSE 3
Fortinet

Practical Malware Analysis & Triage
TCM Security

Tools Used

Security & Monitoring: CrowdStrike, Seceon SIEM, Nessus, CASM (CloudSek)

IAM & Systems: SailPoint IIQ, IBM z/OS

WAF & Threat Surface: Prophaze, SecurityScorecard, Xpanse, RiskRecon, BitSight

Forensics & Scripting: FTK, Python, Burp Suite, FourCore

Interests
